This one-day workshop focuses on advanced irrigation design and management principles. Learn how to combine soils, plant water use and climatic data to establish system design parameters. Conduct detailed friction loss calculations. Determine water source supply capabilities. Determine system components & function. This irrigation design workshop aims to help designers become more proficient in irrigation designing. It is a good refresher for those preparing to write CID Turf-Residential or Commercial exams.

**Pre-requisites: Fundamentals of Irrigation Design course or enrolled for a CID Exam & received textbook.**

### REGISTRATION DEADLINE

Registration is closed at 4:00 pm on Thursday, January 10th, 2022 to ensure delivery of course materials.
